## Get started by setting up iPhone, iPad, and iPod touch

Learn how to set up your iPhone, iPad, or iPod touch. Whether this is your first iOS device or you are replacing one, these steps walk you through the Setup Assistant.

If you want to start over at any point while setting up your device, press the Home button.

This link takes you through a step-by-step tutorial.

https://support.apple.com/en-us/HT202033

Create your Apple ID: STEP 1

From your mobile device, Open the App Store, iTunes Store, or iBook Store on your iOS device.

Choose any free app, song, video, or book.

Tap Get next to the item, then tap again to get it.

When you're asked to sign in with an Apple ID, tap Create New Apple ID.

Follow the onscreen instructions.

STEP 2

When you're asked for payment information, choose None.

After you enter all of the information required, you'll be asked to verify your Apple ID by email.

You must verify your Apple ID before you can begin using it.

Make sure you sign up with an email **that you will have access** – simply go to the email and verify the account.

You are now ready to install Mediprocity.

STEP 3:

How to Set Restrictions on an iPod Touch

This is to keep staff from doing things you do not want them to do on the iPod Touch. If set up properly, you can make it so they are only able to use Mediprocity.

- Prevent the use of apps such as FaceTime and Safari
- Prevent installation of new apps
- Restrict use of the Camera app
- Disallow in-app purchases
- Stop access to the iTunes Store, iBookstore, or App Store

Choose Settings → General → Restrictions

From the Home screen to see the Restrictions screen.

Tap Enable Restrictions and set up a restrictions passcode (which is separate from your Passcode Lock passcode).

Enter a four-number passcode.

(If you change your mind, tap the Cancel button to cancel the operation.)

Then enter the same passcode number again to confirm the passcode; the restrictions are enabled and ready for you to change.

Set the restrictions you want by tapping each control's On switch to turn it off.

By default, all controls are on, which means that usage is allowed (not restricted).

Turn off a control to restrict its use.

If you restrict access to Safari, the Camera, the iTunes Store, and/or the App Store (for installing apps), those icons are removed from the Home screen so that they can't be accessed.

If you turn off Location Services, location data is no longer provided to applications.

Restricted content does not appear when accessing the iTunes Store.

To access the icons and the restricted content, you need to turn off the restrictions first (or turn off all restrictions).

You can turn In-App Purchases on or off, choose a ratings system based on your country, and set restrictions based on the chosen ratings system for music, podcasts, movies, TV shows, and apps.

For example, tap Music & Podcasts and turn Explicit on (to allow explicit material) or off (to keep it clean). To allow movies rated PG-13 and lower (PG, G) but not R or NC-17, tap Movies and then tap PG-13 to set the limit. For TV shows, you can set the limit based on their ratings (TV-G, TV-MA, and so on).

For Apps, you can set the age limit, such as 4+ (essentially anyone), 9+ (must be at least nine), 12+ (must be 12 or older), and 17+ (must be 17 or older).

To turn off all restrictions, choose

Settings →General →Restrictions

and enter the passcode. Tap Disable Restrictions and reenter the passcode.

Your iPod touch is now free.

STEP 4:

Prevention / Safety

It is a good idea to buy a case to protect your iPod Touch, as well as a charging cube to plug into the wall.
